

School 2 Rise

Extended School Year
Grades 4&5

Congratulations on your scholar being selected to attend the School 2 RISE Summer Program!

- Program is from June 29- July 22nd on Tuesdays, Wednesdays and Thursdays
- Academic hours are 9:00-11:45
- Clubs are 12:15-2:00
- Please note, attendance and on-time arrival are mandatory
- Breakfast and lunch will be provided
- Transportation will be provided (should you need it) including to local summer camp programs
- Please be sure to take advantage of this opportunity. We realize this has been a challenging learning year and we want to continue to provide your child with additional time to maximize their potential!

In the 4th & 5th Grade School 2 Extended Summer Program we will be exploring the world of Energy! We will build your scholar's skills in critical thinking, creativity, social awareness, relationships, teamwork, and self-regulation- all while having fun! We will be up & actively learning about all different types of energy; energy in ecosystems, used in people's homes, in engineering design, and the energy it takes to make social change. Your scholar will not only explore and investigate these concepts, but will also continue to develop and practice the skills needed to accelerate their learning and prepare them for the next grade level in September. I can't wait to spend the summer learning with you!

Love, Mrs. Taylor, Mrs. Barton & Ms. McLaren

School 2 Rise

Extended School Year
Grades 2&3

Congratulations on your scholar being selected to attend the School 2 RISE Summer Program!

- Program is from June 29- July 22nd on Tuesdays, Wednesdays and Thursdays
- Academic time is 9:00-11:45
- Club time is 12:15-2:00
- Please note, attendance and on-time arrival are mandatory

- Transportation will be provided (should you need it) including to local summer camp programs
- Please be sure to take advantage of this opportunity. We realize this has been a challenging learning year and we want to continue to provide your child with additional time to maximize their potential!

As students grow they begin to take on more responsibility for themselves, others, and their communities. During this four-week Summer Program, rising 3rd and 4th graders will explore, research, and develop the skills needed to effectively change the world for the better. Students will have the opportunity to collaborate in a service-learning project that examines the importance of pollinators to our environment. Students will feel the joy of learning as they develop the skills for teamwork, communication, assertiveness, growth mindset, and problem-solving to be productive citizens. At the end of the four weeks, students will present a theatrical performance in our outdoor garden classroom that culminates their learning. The performance will serve as a fundraiser in order to make a donation through Heifer International. We hope to see you there!

Love, Mrs. Panganiban and Ms. Tighe

- Please be sure to take advantage of this opportunity. We realize this has been a challenging learning year and we want to continue to provide your child with additional time to maximize their potential!

Students are working to contribute to a better world by applying their learning to help their school and community. Students will learn about why trees are so important to living things; including people and animals, why people plant trees and the different ways people enjoy and appreciate trees. Students will engage in hands-on labs to create 3D trees. We look forward to continuing to work with your scholars this summer!

*"Unless someone like you
cares a whole awful lot,
Nothing is going to get
better. It's not." - Dr. Seuss*

- Please be sure to take advantage of this opportunity. We realize this has been a challenging learning year and we want to continue to provide your child with additional time to maximize their potential!

Rising first-grade students are exploring and researching the importance of birds in our world. Students will explore birds through research, thinking about how we can care for birds, and taking action through literacy and artwork. Throughout the summer program, students will collaborate with their peers to help make a better world by taking action in our community. Students will engage in hands-on science labs throughout each week; that will focus on collaboration, problem-solving, and developing social skills.

The summer will culminate in students creating a brochure of local birds as well as a public service announcement in which they will describe why birds are so important and how we can work together to keep birds safe in our communities. I am so looking forward to this program focused on learning and discovering together!

See you all soon,
Emily Neuffer
